CATALOGING PREP

SEED AND PLANTING STOCK DEALERS

A directory of dealers
that sell the more common forest
and shelterbelt seeds and plants

Forest Service - U. S. Department of Agriculture
May 1972

The purpose of this Directory is to provide a list of possible vendors that sell the more common forest tree and shelterbelt seed and plants. It is published for the convenience of seed and planting stock buyers. Some of the common species are not listed because no dealers indicated they could supply seed or plants of those species.

The information in this Directory has been compiled from data furnished by the dealers who responded to a letter sent to all commercial dealers of which the Forest Service of the U.S. Department of Agriculture and the State Foresters had a record. Endorsement of the dealer or his products is not intended and must not be inferred.

CONTENTS

	<u>Page</u>
I. Geographic Origin of Seed.....	ii
II. Names, Addresses, Telephones, and Assigned Code Numbers of Dealers.....	1
III. Information Supplied by Dealers Regarding Minimum Orders and Seed Certification.....	8
IV. Commercial Sources of Seed and Planting Stock for the More Common Forest and Shelterbelt Trees and Shrubs.....	11
V. Sample Data Form for Forest Tree Seed Origin and Quality.....	24

I. GEOGRAPHIC ORIGIN OF SEED

Most of the dealers of seed and plants in this Directory of Commercial Dealers in Seeds and Planting Stock for Common Trees and Shrubs will, upon request, furnish data on seed origin for the seeds and plants they sell. Some dealers certify seed.

Research in this country and other countries has proven the general superiority of forest and shelterbelt plantings made with planting stock from seed of local origin which is seed from an area subject to similar climatic influence usually within 100 miles of the planting site and differing in elevation by less than 1,000 feet.

If seed or planting stock from seed of local origin is not available, the best second choice would be that from a region having a length of growing season, day length, maximum and minimum growing season temperatures, rainfall amount and distributions, and other environmental factors comparable to those at the planned planting area.

V. SAMPLE FORM"FOREST TREE SEED ORIGIN AND QUALITY"

(This is a suggested sample form for obtaining data on seed origin and quality. A seed collector or dealer would usually be unable to provide all the listed information for every seed lot; however, the data should be as complete as possible.)

SPECIES: Scientific Name: _____

Common Name: _____

SUPPLIERS: Number or other identification of seed lot: _____

Collector's Name: _____ Year: _____

LOCATION OF SEED COLLECTION AREA:

Nation: _____ State or Province: _____ County: _____

Township: _____ Range: _____ Section: _____

Altitude (ft): _____ Latitude (°, ', "): _____ Longitude (°, ', "): _____

Other specific location identification: _____

_____. Can stand be relocated for future collections? _____

DESCRIPTION OF STAND AND SEED TREES:

Name of Seed Orchard: _____

or developed seed production area: _____

Are seed trees natural? _____ If not, what is origin of parent trees: _____

_____. Was seed collected from a single tree: _____

Distinctive characteristics of seed trees: Bole _____

Crown _____ Branching _____ Growth Rate _____

Other _____

QUALITY OF SEED: Purity _____ %; Germination _____ %; By whom was

it tested: _____ Date: _____

Signature _____

Title _____ Date _____
